

===

MTS retiree Ronald Vinnell requests your assistance.

Ron was recently diagnosed with mesothelioma, due to exposure to asbestos. He is hoping to reach out to his former MTS associates to advise them of their own possible exposure and subsequent health risk.

Following in the footsteps of his father and grandfather, Ron worked for MTS from 1954 to his retirement in 1992.

Throughout his 38 years, Ron worked his way through the ranks - from a labourer digging trenches to lay cable while street cars rolled by, to journeyman apprentice as a switchman working with no. 12, 17 and 51 motor uni-selector switches and no. 5 crossbars, to supervisory management.

Ron hopes to speak directly with other ex-"MTSers" to help him recall more about these job activities and where asbestos contact may have occurred. (*specific products used, building environments, etc.*)

Please send any related information and personal contact details via email to: Rvinnell1@hotmail.com
Ron will contact you as quickly as he can.

Thank you for your help.
